

OCTOBER, 1915.

Monday 4

We are settling down to the life here now. There is a great deal of fatigue work to be done, and we get as much fatigue as drill. We were prepared for an inspection to-day but it did not come off. The Mooris from the Peninsula and the remainder of our infantry arrived in camp to-day, having left the trenches yesterday. There were about 120 Mooris came in, they seem to have stood the strain very well indeed. Met J. Williams at the isolation camp to-day.

Tuesday 5

We were given $\frac{1}{2}$ hour physical drill this morning before breakfast. Parade again from 10 to 12. Was on water fatigue this evening. Was often see an auship circling round the island. Have had a slight attack of dysentery. No medical inspection to-day.

OCTOBER, 1915.

Wednesday 6

Attended sick-parade this morning for dysentery. We are had a pretty rotten day. Doctor gave me some pills. Good many of our chaps have the same complaint. Was put on L. D. General Godley inspected our forces here this morning. Picket for one of the villages provided for our company this afternoon. I was down for it, but could not go.

Thursday 7

Very bad to-day. Laid about all day
