

"New" unpleasant party from kitchen who had come up from the Garrison  
The date of the trip was bettered with packed wine & bottles  
Culprati & "Telefonia" he left at 2.40 & got back to the  
Hotel at 4.45.

Aug 23. We caught the auto down at 7.30 & got to Iruia just  
in time to catch the 11.25 train. There was no stop  
except at Campanario, where I really got out & got  
some bread & sausage & wine. We got to P. Antequera  
about 2. I walked up to the Steamboat where we  
found the luggage we had posted from Zermatt  
They were full at the steamboat but got rooms for us  
at the Palace. I went down to the Klementy  
after tea to try & find the Osbornes, they had  
left a note he was out.

Aug 24. I went to the celebration at 8. We went down  
the tunnel with the Osbornes & did odd jobs.

Aug 25. We got up at 6.55 & caught the 6.55 to  
S. Moritz & took the new cable railway up to

Piz 07. Chacabarella & on to Corviglia about 2,200 meters.  
We left the station at 8 & heading below the  
Corviglia and struck across to the north  
We walked for food just before the Scherer lake  
By the lake is a club building belonging to the "Grain House"  
Club. We got to the top at 10.30. We then circled  
round so as not to lose sight & went up a gully above  
Opposite which goes through the path from Samedan  
just W. of the zigzags on the S.A.P. map. It was then  
11.30. We had some good tracks & got to the top at 12.30.  
It was a glorious day & a most wonderful view. We stayed  
there till 1.15. At 2.15 we were at Fontana Grande  
& had food. We left at 3.15 & went down & were getting  
to Samedan at 4.50 & just missing the train  
We took our auto up to P. Antequera

Aug 26. The Osbornes asked us to go fishing with them, so we joined  
them early & went down to P. Antequera where Osbornes got a permit  
to work on the P. Antequera & had lunch & took a boat. I know for  
sure 1/2 hour & then Osbornes started. I then Osbornes  
came in & he & I held the boat till about 4. We then  
went to a run. However it was very jolly & the Osbornes  
were in great form. We went back to the hotel & had  
tea & then motored back to P. Antequera

Aug 27. We packed & got off at 4.21 & went to S. Moritz where there  
is a comfortable little inn P. Antequera

Aug 28. We got off at 6 & walked along up with heavy loads  
We got to P. Antequera at 8.10 & had food till 9.15.  
As we passed the higher Chab - they asked us to take  
some papers up to the hut which we had been given up  
in July. The hut is visible but after climbing  
the corner & rain & fog is visible & the hut is  
behind it. There was a series in it a man  
& his wife & their son. We had food & the  
jackets & saw returned from Piz 07. We slept  
& checked generally.

Aug 29. We were up at 3.30 & off at 4.15. The track leads straight  
to the end of the lateral moraine of the glacier descending  
behind P. Antequera & P. Antequera. The top of the moraine is  
L. of the moraine & has some. This would be the  
any extent of the land "jerg". We kept to the moraine  
on the E. bank rising as we went & got on to the ice about the  
2850 level. In the descent we kept to the ice. In the  
early morning the low ridge would have probably been  
crevasse, but with the snow we do not get high enough to the flat  
level. We got on to the ice & found good snow &  
useful steps when we began the ascent. We found the  
the "L" "id" of Chacabarella & then went on to about the figure 3120  
& then went on to the top because N & went to the little  
well peaks visible from the hut. Piz 07 was visible
