

Jenide stem is an embossed figure over  $\frac{3}{4}$  size. It is broken off from  
1 S. half of main stem & hidden at the base. It is XV. and looks  
very nice. This was the place it occupied a portion of large  
& clump. The lower clumps were all destroyed a portion of large  
Li clump plain steel wood board at N. pointed at E. or S. to  
approx. 6' long. It had been open 6 weeks or less in L. or Sybun  
ranger area. It has some open spaces in L. or Sybun  
the old "place" of approx. Jenide still remain in large  
clusters. Dwell house by the head of Catatum on 1/277. Due  
like all other places - see H. in main street.  
4. At 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 & 1.6 &  
Sun flower & Jenide. Both flowers like my others are very true  
stem in a zigzag wavy shape. Small leaves V-shaped & stem. Film  
Austin SLA - 4 and 5 year old tree. No P. & R. Jenide stem 1/20 -  
2 year stem. Left my last, enlarged on the cultivated. Cultivated  
out in planted - no one to sell for plantin - plants escape to  
certain well on the side of mountain - on the few  
along line. It between an old cattle yard & a "repairs"  
or den of rotten. Below 1/5-23 & 1/5-34. Done because  
of number of cattle that have been lost on away  
fishing for King. The Carman that live there & is known as  
Census of trees but Melan color. It is Jenide. Clean all  
the stems stained with the red sand ceiling is on under side of  
the stem also. In 1934 it was painted & the was a surprising  
loss of stems. Possibly most come the sun was hot so hot & the  
"P. & R." paper" was caused on the bottom of the earth as from. One sun  
is when these stem died their bark with the Jenide &  
the Jenide was the cause of them. It was sun was reflected from  
the sun & was heated but not by a fire. It was very warm for  
it to get & the water turned him to ice. When we got back  
during the time the water did not melt & freeze. But the  
waterman is not under. A fence in King N. Munro's Jennifer

Trujillo & then south back to my back in my bedroom - they are dry  
cause back. In house - in general broken, ruined the best -  
the - in center - set back, in bed nicely mounted, & two  
handed a French wine bottle in the "Tuili-Drai" & with  
watered a French wine bottle in the "Tuili-Drai" & with  
the first wine & then clean back & down. Down side  
driving train road in the afternoon.

Fri. 25. Belloti-Stalin & third Friedman class auto; then walks on  
to Deauville (Dalle) about 5 kil. west of Antibes. Had a  
book found answer in and took off. Both horses saw the stage  
& the church. A Deauville train. In South part of the stage in  
Cannes with a lot of judgment. Remained well at XIX & the next  
new elevation. Cannes, it was remarkable to Pekin & Province  
such beautiful hundred miles. Pekin was going on back to  
there and at the station was filled with S. & the strength:  
in some I got back I sat off the Cassellum D'Amour, & they  
left like a candle & blew up in Pekin in Deauville. It is also - S. &  
most of the road we went along to the river of the castle.  
Castles in Pekin like in the angles (a lot of stone) few  
& driven along Kek. Are good open thin about the Yangtze  
is of long slender arches, each arching over road & water  
them out, tell it's carrying a good castle like this,  
in I have before like about four or five hundred years ago  
in China to China a well. The buildings goes back to  
Guangzhou - & to the end, in the N end, the Colosse  
Creek or bay. Here are very crowded with the vicinity of  
Jenoune. I will now in almost to the Dark River. It was back  
of the town facing with Kek out - here & is owned by H. J. Mueller -  
expenses from him the in form a house - own it. Only  
one house in building of Castellum & outside is old.  
In village cause a well what seems to be gypsum - to no  
cause of the stones. I took a shot and back now a tank  
& way I go walk.
