Lee. I went to sleep & woke up at 11:45 just as the conductor  
came to call me. I got off at Kamloops at 12 midnight

May 18.

I went to the Plaza hotel & got a bed & went to sleep. I had  
tea at 7. Got up & had breakfast & then at the

is in connection with the Plaza. I repacked my baggage &  
took up what I wanted leaving some things there. I took

An anti starting at 11 & getting in about 11:45. 2 S. Colls

also took at Paul Lake. I repacked & had lunch

& went out in a boat & got 4 fish & was back at 4. After

Handwritten Paul Lake

the I changed. & after dinner had a drink. The lake is

is very comfortable & apparently the fishing is very good

May 19

The night was very cold, but the sun was very hot. I got up at 7. After

breakfast I took a couple of fish & then went fishing. There was very little

breeze & in consequence nothing. After lunch I went out again about 2:15 &

caught one. No one seemed to be doing much else than fishing. Had the

two fish of my 8 ft rod mended & whipped a bit more at one place.

Dinner at 6:30. Went out after about 7:30 & caught 7 fish of

which I got 4. back at 9.

May 20

Woke up at 7:20 & got up. Set out about 9:45 used a "plug" of the

lake as it was very calm & got 4. Then about 11:30 began

to fish at first using dry but for about 12-3 had

got from 8-13 fish, the location fishing too. Next from

are the best results in Paul Lake. but then went ashore

& boiled coffee & had food & began fishing again at 3:30. However

a bit of breeze came we got fish. In some cases 10-9 fish & then

began to but bank very except by one. About 5 we had

one limit 15 each & set off back. On our return

the fish we were carrying & weighing had 45 lb. he found he had 32 fish

within a 30. However! Bill Deter told me about

a rod. If an 8 ft with handle & vibrator. It should be

between 100 & 110 lbs. & if the handle begins to

vibrate it is a sign instead of up & down, it is a sign

the thing may mean that it is changing the way around it may be  
concealed. Saw a group of fish which was being landed.

At night sat in the hospital ward & listened to the  
of frogs - Canadian nightingales!

May 21.

Slept in, but got up sometime 10. We began to catch fish  
in the lake just before the bluff in the center & fished

there till 12:15 when we had 9 fish. Then we had some  
lunch & coffee & started out in school with the upper part

of the lake. We caught 5 more up to tea. But then  
fish were coming slow & we had a good heavy cure

after being in there for some time. We had coffee  
at 3:30 & then started again & got 7 more

then it came on to pour with rain. The fish began  
to take place but it was too wet & we went ashore

& stood under some trees. At 5 we started again  
& some caught but 6 more fish two of them back

small ones. It was still raining & then I had a  
accident my canoe & fish was very wet, kept

back at 6:30 & after a hot bath & a change &  
had dinner. The fish were very level to

& all good fish.

May 22

Bill Deter came of fine day & the other things had  
dried in the very hot sun. It was fine morning with a

fair ripple on the lake. We got off about 10:15. Almost  
at once we got a 3 lb limit, we went on beyond the

harbour but it was very windy & we had hard to get on  
land at. We had lunch at 12:15 & then had a

3 fish. We fished on till 3:30 when we had tea  
& then fished again. We got 15 in all & 2 "black"

fish we put back one was a good fish of 2 1/2 lbs. It  
was very hard work going back against the wind

and got back at 6. Went out again after dinner but  
it was too cold & in some cases in again.
