SALES

ENGINEER

Through their technical experts BP provides an advisory and consultant service to their clients to ensure that the Company products are used with maximum efficiency and economy Their work involves the practical application of engineering experience and principles to a wide range of industrial problems and is both stimulating and rewarding.

To be successful in this constructive approach to marketing, Sales Engineers are required to keep themselves up to date with current developments in their particular product field. Such work demands both practical and administrative ability and the personality to discuss contracts at executive level.

Experience in the two fields of engineering and marketing, together with the administrative responsibilities of the position, all provide the successful applicant with excellent opportunties for advancement. If you are a young man, 25 to 30, with a

ate level, or a First Class Marine Ticket, or a similar engineering qualification, you are invited to make application, stating full details of age, education, and experience. The salary will be highly competitive and will prove attractive to the high calibre of man the Company wishes to employ. Other fringe

benefits include participation in a generously
