

APRIL, 1916.

Sunday 9

Weather is still beautifully calm. Saw some islands and a lot of shipping. We paraded at boat stations at 10:15 every morning for inspection. We were inoculated again to-day.

Monday 10

We passed N. delta early this morning. Went quite close, could see the towns & villages quite plainly. Able pointed out some places he knew he was in hospital there. Got off park dull because of inoculation. Passed another big island this afternoon. Gas helmets served out to-day.

APRIL, 1916.

Tuesday 11

Passed a good deal of shipping & some islands to-day. Had an aerial parade on deck. Had a long coast line in rear all the morning; was told it was the Island of Lardner.

Wednesday 12

Arrived at the entrance to N. delta. Blowing a howling gale, impossible to stand on deck. Ship pulled in & anchored in outer harbour. City looks very picturesque being built on the hillsides. The harbour is full of shipping. Auster parade with all gear up this afternoon.
