

Delta No. 1000 in note of the Hillyard River 8 x 8 1/2 inches more or less as usual  
 very deep. I am however sure it is a fault of the land off-approach.  
 July 9<sup>th</sup> 1854. Mountain said to be 116 ft.

Sept 1854  
 Sketched on page 3

Mountain after first descent in western part of the valley (Dumont 57)

The first mountain seen very early around 11:45 AM. The first seen in hills & low hills  
 mountain seen very high but not seen till 1:00 PM. The first seen in hills & low hills  
 between May Lake here.

Rainy in Falls

This morning I had seen a number of the Rocky River to the north  
 of the falls. The first seen from here they were the first  
 seen on the left. I saw some more on the right side of the  
 valley about 1/2 mile north of the falls. I saw some more  
 on the right side of the valley about 1/2 mile north of the  
 falls. I saw some more on the right side of the valley about  
 1/2 mile north of the falls. I saw some more on the right side  
 of the valley about 1/2 mile north of the falls. I saw some more  
 on the right side of the valley about 1/2 mile north of the falls.
